

Manufacturing

Manufacturing companies continue to be challenged by marketplace demands for product innovation, competition from lower-cost jurisdictions, economic restraints, employee concerns and an ever-increasing regulatory burden. In many sectors the substantial costs of products liability, insurance and workers' benefits places increasing pressure on margins and the ability to make adequate capital investments.

Our Manufacturing Industry Team understands the pressures facing the manufacturing industry and helps its clients devise solutions that are geared toward each client's particular business and industry. Just as our clients' products must be carefully crafted to be successful in the marketplace, our services are designed to be responsive to the unique combination of challenges facing manufacturing companies.

The Manufacturing Industry Team has significant experience in legal issues, some unique to manufacturing companies, including: Employment, Distribution, Organization, Real Estate, Risk Management and Insurance, Products, Trade and Transportation.
